

# MICROSOFT DYNAMICS 365 & POWER PLATFORM RELEASE WAVE REVIEW

Every year Microsoft announces their coming plans for Dynamics 365 and the Power Platform. The release information is provided in "Waves" focusing on important feature changes or improvements.

## Why Is This Important?

These Waves hold important, sometimes critical information. Organizations using these products could find themselves in an undesirable position if they are not prepared for some of the more mandatory software upgrades or scheduled deactivation.

## Service Description

TrellisPoint's "Release Wave Review Service" helps companies with Microsoft Dynamics 365 CE and Power Platform systems understand the implications of Microsoft's biannual Release Waves by:

- Showing you how to locate and use Microsoft's Release Wave Planner resources.
- Providing a high-level overview of the current Release Wave information.
- Making specific recommendations for your unique system from the perspective of the TrellisPoint consultants who work in that system.

## What's Included?

### Two 1- Hour Meetings

- Meeting #1 in Q1 and Meeting #2 in Q3
- Review how to locate and use Microsoft's Release Wave Planner resources.
- Review highlights of the most recent Microsoft Release Wave for systems you currently employ.
- Review thoughts from TrellisPoint consultants on how the current Release Wave might impact your system.

### Recording & Recap

A recording and written recap of the meeting with suggested enhancements/training.

### Whitespace Analysis

A "whitespace analysis" of your current system including suggested enhancements.
